PUTTING OFF THE MILK SUPPLY?

Hereafter the local dairy farmers have been securing a large part of the milk sold in the city from farmers living a few miles out. One of these farmers—one of the most progressive, by the way, in the district—told the Bulletin a few days ago that the new regulations approved by the city council were likely to drive the farmers out of the business. He was, he said, quitting it himself, and others had told him that he would be the same. The reason was that the regulations imposed conditions some of which would eat up the profits, while others simply would not be complied with at all. Though he had ordinarily good sales and kept them clean, the new regulations would make it necessary for him to tear down and rebuild, and he could not see where the dividends were to come from. The reason was the "third milk" rule. The distance of this individual for milk is, however, even under the same conditions, at least he does it for the reason the small boy splits the kindling, and with much the same meaning. The more numerous the rules and regulations that have to be complied with, the greater his dislike for the business of farm life, and the more he is inclined to leave it. The informant assured the Bulletin that to impose upon him all the new regulations simply means that he will tell the farmer to go to the milk business. And under the circumstances the hired man can tell the farmer hereafter pretty much what he pleases, for his species is very rare, and the opportunities for other employment many.

If the regulations work out in the way this farmer declares they are working out, the city will be thrown altogether on the heels of the city men for its milk supply. Now, during the past winter the problem of the housewife has been to get sufficient milk for the family. The question of price and quality together aside, the dairyman had not the milk and declared he could not get it, and the patron had to be satisfied with what ever he could spare. If the milk supply has been so short when the farmer was free, without making too heavy an investment in business and without taking any risk, and the conditions, to keep a herd for supplementing the supply from the dairyman's herd, it is likely to be more burdensome if the milk is not out of the business, if that is done the dairyman must supply his customers altogether from his own herd, and naturally he will only keep cows enough to meet the ordinary demand, but when the milk is not supplied unexpectedly he has been able to meet it by buying from the farmer. With this reserve supply out of his hands, he is handicapped, and instead of getting better milk or cleaner milk, the customer may find that the milk is not at all times. During the summer season when milking cows can be easily taught to meet a growing demand, there is comparatively little fear of a shortage in the milk supply. The pinch will come next fall, when the farmer has turned his dairy herd into beef, and when the dairyman finds that he has not enough cows to produce the needed supply, but can buy neither cow nor milk from the farmer. That condition once brought about cannot be remedied in a day. If avoided it must be avoided now. The council would be doing well to look over the regulations and see if it is imperative necessary to enforce all of them. It is well to approximate the best as nearly as possible, but care must be taken that in trying to safeguard the quality we do not cut off the quantity.

The Montreal Herald thinks Mr. Jordan is in the position of having to declare his attitude toward the property while in the West, and that if he does so he will lose either the vote of a voice of the eastern Canadian front. The Herald should know that the "Jordan" brand better than that. Mr. Jordan may not be a very ardent talker, but he has succeeded so far in retaining the loyalty of the eastern market because of his ardent friendship in the West should for the reduction of duties on certain livestock manufactures mainly by his friends. He should be able with equal success to steer for the few weeks he is in the city, and the prospect is altogether in favor of his trying it.

Between two and three hundred tons are grading on the railway from Edmonton to Athabasca Landing, and a contractor this week sent out a large outfit to start work on the line.

rehabilitated from Onaway, toward the Peace River district, if the promise of the vice-president of the Canadian Northern to the Provincial Government and to the public through the press is made good, and if the men and teams can be got to do the work, a number of miles or more will be graded this season on the line from Morinville northward toward the Peace River and Calgary. The work is not being done in the summer months about the indifference of the Provincial Government to the opening of the north country. The city was a foolish one and could only have originated with those who are prepared to pay any price in order for something which to figure a political opponent. It is not, in fact, the construction program, being rushed forward, likely to be revised, or if revised, to gain much attention as a cheap scheme of public entertainment.

It is reported that the new commission are not being overworked—that they are not even assembled with office from at the city hall. Why is this? The city is saying then for their time, and is entitled to it, and all of it. They, too, are entitled to have their opportunity to have their time, and are entitled to have their time. They are appointed for something worth driving away for.

The Monetary Times, having dared to assert the right of Hon. Frank Oliver to have a bank account, and to have it treated as other men's accounts are treated, may now expect to have their right out of the ranks of regular journals by the political enemies of the minister.

A DANDY TRUCK.

Starchoma Plaindealer—Elsewhere in this issue will be found an account from the Monetary Times on the other side now under investigation at Ottawa. The Plaindealer has not been in full accord with the same thing political has taken during the last year in Alberta. We were not in sympathy with the attitude of the Edmonton Bulletin at the time of the legislative turmoil over the Alberta and Great Waterways railway affair, but were willing to accord to that paper and to the Bulletin the same right of view in the political quarrel in a different light from that which it up our opinion. Undoubtedly the stand taken by the Bulletin at that time in the cause of the dairy industry. Hon. Frank Oliver recently made by certain of his political enemies, once his most ardent supporters. It may be that the minister has been guilty of grafting, if so, we hope the investigation which he has caused will lead to his exposure, and retirement from public life. His conduct, however, up to this date does not lead one to suppose that such is the case. The article published recently in the Bulletin was intended to kill him politically at one stroke, but has failed in its purpose, and as one of the most cowardly and dastardly attacks on a public man that we have ever seen in the Bulletin.

Along the line of what the Monetary Times says regarding the minister may add that a report has become current since the Imperial bank man.

agreement between the investigation of how information regarding the private account of Hon. Mr. Oliver was obtained by the public through the press. It appears that not only were several employees of the bank offered large sums of money to give out the information desired by the black-handers. Evidently the investigation was too great for the black-handers and he betrayed his trust to the extent of making what purports to be a copy of Mr. Oliver's bank account of four years ago. Strangely that, possibly the minister had a robust balance in the bank at that time there is no evidence on file as we have been able to learn that it was not a trust fund or that it was not obtained in the course of legitimate business transactions. As one man of experience in eastern politics, where bribery and corruption have been known to exist, says: "The custom of bribery and corruption is to avoid as far as possible bank accounts and their tell-tale checks." He tells of old bills and the usual medium for corrupting elections and the man who gave him the money in the bank is not only ashamed or afraid to have his check seen, though he does not intend to give it to anyone else, but he is ashamed to show it to anyone else.

This plot was hatched by certain supporters of the late Rutherford government in this province, but they are not so sure that they believe that anyone who knows ex-Primer Hubbard would consider him sane enough to enter such a plot, representing this province generally at the Imperial conference when the conspiracy was hatched. With some caution, if they would commit him with it.

THE FINANCIAL AND COMMERICAL MARKETS
 EDMONTON, CITY MARKET.
 Edmonton, May 26.—An upward movement, similar to be general all along the line in grain. In sympathy with the Winnipeg market, wheat advanced three cents at elevator prices while locally it is considerably stronger. Oats are sold regularly at 14 cents whenever they are offered by the country. Creamery butter continues to weaken, but probably the most account of the opening of better factories all through the country. Potatoes are a somewhat uncertain quantity; there has been quite a run of farmers into town during the past few days, but the market is not so hot. In the better demand still seems to prevail with the supply and there is no appreciable reduction in the price.

BOULTON CLAIMS ANOTHER VICTORY

**Decision on Power House
Machinery Based on His
Recommendations.**

The value of the Parsons report was again the subject of discussion at the meeting of commissioners yesterday afternoon, when tenders for and additional 2,000 kw. unit for the power plant called for by a majority of the board against the proposal of Commissioners Boulton and Hutchart, who held for their contention that a 1,200 kw. unit should be ordered, were opened and referred to the superintendent of the power plant for analysis and report.

Tenders for 2,000 kw. machines, submitted in accordance with specifications issued by the commissioners several months ago, were already in the city office. At the last meeting of the commissioners a motion was passed authorizing Mayor Armstrong and Superintendent Hutchart to call the power plant, to wire the firms who had submitted their tenders for further tenders "along the lines of the Parsons' report."

The telegram prepared by the superintendent, called for a machine which varied from that originally specified, only with respect to the exciter, the requirements for which were amended, not in accordance with a suggestion made by the commissioners, but in accordance with what was previously decided. While the price varied in some cases from those previously submitted, the tenders, with the one exception of that of Gorman, Grindley and Grindley, who previously tendered a 1,000 kw. unit, all made on the basis of the tenders previously received. This latter firm, whose representative was present, will submit tonight to the superintendent the machine for which they are tendering.

"In other words," remarked Commissioner Boulton, "this action is not based upon the recommendations of Mr. Parsons. We are exactly what we stood several months ago. In considering these tenders we have to base our conclusions upon the information we had before we opened these, except in the case of the tender of Gorman, Grindley and Grindley, the information for which is not submitted until after the tenders were opened."

Will Be Needed In November.
In reply to a question from Commissioner Hutchart, Superintendent Boulton stated that the installation of the machine would occupy six weeks or two months, and that it will be needed by a date late in the middle of November, or that could be received and installed by that date would be that of the Allen Chalmers Co., whose figure is \$44,000, and who undertake to guarantee shipment from their factory in Milwaukee within ninety days from receipt of the order. The next shortest delivery is that of the Canadian Westinghouse Co., who guarantee shipment from Pittsburgh within 110 days, and whose price is \$42,825.

The tenders were referred to Superintendent Hutchart for analysis, and his report will be submitted at a meeting to be held this afternoon when the order will probably be placed.

Trucks for Street Paving.
Tenders for street paving, analyzed and tabulated by the city engineer, were received. The engineer recommended that, unless it were decided to build the street, the contract be awarded to the Hittite Company. After some discussion it was decided to defer action on the tenders until tomorrow, when the city engineer will be held during the afternoon.

Tenders for repairs to buildings at the power plant, which have been in the hands of the commissioners since April 12, but could not be dealt with because of the failure of the committee to pass the bylaw, were considered, and a contract awarded to J. Carroll at the figure quoted in his tender, namely \$2,192.

A convention of waterworks superintendents is to be held in Rochester, N. Y. June 4th to 10th. An application for the superintendents for treatment in advance of \$250 for expenses was refused as contrary to a rule which forbids several months ago that payment of expenses, when granted, should be made only after return and upon receipt of an itemized statement. Notification was received from the Minister of Labor of the appointment of a board of conciliation to consider the subjects of difference which have arisen between the city and the electric workers employed in the city. The matter was referred to the city solicitor to take whatever steps he might deem necessary.

Hays and General Manager
Chamberlain.**

The removal of the G.T.P. tracks from the south half of 7th street, from the north half to the south half, was the subject of discussion at a conference held by the city council, President Hays and General Manager Chamberlain of the city hall last evening. The outcome of the conference was that the company agree to make the change suggested by the city, subject to the meeting by the city of the strip which will vacate forty feet in width and extending from First street to a point between Seventh and Eighth streets. This the company's officials said was the inducement offered to them last year by Mayor Lee when the city first approached them with a request to make the change. The agreement, made with the city when the railways first entered Edmonton the agent of C.N.R. is required to do any change as that which is proposed. The city was unable to obtain any reply to communications addressed to this company, the subject, Mr. Chamberlain gave his assurance last evening that Sir William Mackenzie had his consent, subject to the condition of the paving of the street for the city. The paving of the strip will involve an expenditure of approximately \$15,000, and the city has been unable to find any record on the files of such an offer on the part of the city. The company were unwilling to give an assurance that this would be done, in the event of such a change being reached, however, it will be necessary to submit the matter to the referees by referred bylaw.

OFFICERS WERE KILLED.

The attitude of the G.T.P. officials was one of willingness to make the proposed change subject to the condition mentioned, but President Hays stated that in the event of the city failing to grant what they are still to have offered through Mayor Chamberlain, he might be changed. He said that Sir William Mackenzie had indicated that, in the understanding and that, as he is in England at the present time, a long period must elapse before any communication could reach him and a reply be received.

No assurance was given by the council that the city would comply with the requirement, and action is deferred pending report from General Manager Chamberlain of a committee of the communication addressed to the company by Mayor Lee and a copy of the same obtained by Mr. Chamberlain from Sir William Mackenzie giving his assent to the proposed change.

The request for the city for the removal of the company's tracks from the east end of the street was abandoned.

Closing McDougall Avenue.

At the informal conference held by the council with the company's officials on the previous evening the closing of McDougall avenue from Clark street to Isabella street was suggested by President Hays. It is understood that the suggestion has been abandoned, from a proposal of the company to erect a station on the property in this neighborhood. The request, if accepted, would have the effect of closing part of one of the main thoroughfares of the city and place an obstacle in the way of access to the new market area. It is understood to have aroused no little opposition on the part of several of the aldermen. In view of the fact that the subject was not mentioned at the conference held last evening it is assumed that the suggestion has been abandoned by the company, an assumption which rather detracts from the fact that all parties concerned refused to make any statement upon the subject at the close of the meeting.

Design of New Hotel.

A sketch of the general design of the hotel to be erected on McDougall avenue, overlooking the brow of the hill was exhibited to the members of the council by Mr. MacFarlane, of the firm of Ross & MacFarlane, of Montreal, the architects who are preparing the plans. The dispute between the Salvation Army authorities and the company regarding the option on the property given by the representatives of the Army in Winnipeg is understood to have been settled. The matter will be referred to arbitration. President Hays, however, would say nothing of the intention of the company with regard to the time when construction will be commenced, merely declaring that nothing could be done until it has been ascertained whether the parties to the deal which has for its object the quashing of the bylaw granting special privileges to the company intend to proceed through the courts.

AMERICANS WIN FIRST POLO GAME

But the Englishmen Made a Great Fight and Lead for Three Quarters of the Game—Next Game will be Played on Monday.

New York, June 1.—The American game on the International Polo field was given a lively start by the challenging English Cavalry officers, who in the first of the matches for the trophy, outplayed and outshot the Meadowbrook four for three-quarters of the match only to be out-riden by the defender until the English finally secured the goal.

The Americans were five to one favorites the strength of the English team astonished the big crowd and the game was replete with thrills for the greatest attendance in the history of polo in this country. The second match will be played on Saturday for neither team cared to renew hostilities on Saturday afternoon after today's struggle.

Meadowbrook drew goals principally through the great riding of Devereux Milburn, while L. A. Noel followed over the ball fourteen times between the American goal posts but three goals for crossing cut each other, the Americans by a goal and the Englishmen by a full goal. It was a heavily contested game and played faster than was anticipated after yesterday's heavy game. Through out three-quarters of the fifty minutes of actual play the game was not by the English officers and the team with whom they were playing. Only in the fifth period, raised unexpectantly they rallied in the sixth period the most talked of team work of the Meadowbrook quartet was lacking, while the two Waterbury forwards seemed nervous and uncertain. L. W. Waterbury came two crumpled the first one a few seconds after they were started. On the other hand the English challengers after losing the ability for several weeks broke force by means and uncovered a game that was surprisingly effective, especially in the last driving in that almost invariably preceded a long drive out. Their strategy of attack was also a revelation. In the seventh period Milburn affirmed the American defense, dashing into the game and leaving Whitney to defend the goal. This turned the tide and his two goals with that of L. Waterbury, brought about American success. Until the defenders started off in a manner that seemed to fulfill expectations, Whitney gathering the ball in mid-air and with the help of the two Waterbury driving the first goal field of two minutes play. Then the Englishmen came back, leaving the Americans to their own goal line where East, Edwards shot the second goal practically on his own initiative.

In the second period L. Waterbury was again outplayed by a goal and goal for England. No scoring resulted in the third or fourth period, but Milburn in his anxiety to score a goal, crossed Capt. Chappin and the American score was cut down to half a point.

Larry Waterbury, Meadowbrook, and Harry Payne Whitney, and D. Milburn. The game was won by the Americans in the first quarter. The second match will be played on Saturday for neither team cared to renew hostilities on Saturday afternoon after today's struggle.

In the fifth period East, Edwards by more driving, rating, shot two more goals. Capt. Chappin, however, was punished for crossing Whitney while Milburn had scored again for his team. The period ended with the score three and one to the Americans. The sixth period was a struggle in which the English were out-riden by the Americans for the second or third time, and after that English always led and only after a heavy American score, the English were added to the American lead. Waterbury, Milburn scored the last goal by making a goal in the seventh period, while Noel—out of the match, England team again scored when Capt. Wilson crossed Waterbury.

Montreal, L. E. May 28.—A sports event second only to the international yacht races in international polo, will take place tomorrow when the American polo team and their English rivals enter the field of the exclusive Meadowbrook, 1908, for the first three matches. May 21, June 1, and June 7, which will decide the possession of America for the first time in thirty years. The great interest in the polo match is due to the fact that the American team is composed of the best players in the world, while the English team is composed of the best players in the world. The match is expected to reach the grand total of two hundred spectators.

The English team, Captain P. W. Hargreave, Captain L. E. May, L. W. E. Palma and Captain Hamilton. The first one a few seconds after they were started. RUSSIA WANTS CALGARY RACER

General H. B. 2012, bought by Agent of Russia Investment—owner of the city of Moscow. Speculation as to Price Offered.

Calgary, June 1.—Last year's high price for Calgary real estate are being paid in a different direction and leaving the announcement that the St. Louis team in the National League has offered President Rogers, \$1000 or more for pitcher Vito Marzulli, comes the information that the Russian government is after the famous Calgary horse General H. and for nearly a year, offers have been made to the owner, who again appears in the city this week, and has again approached Mr. Haak with a view of making the horse his own, but was refused.

Mr. W. P. Parkin, Cleveland, one of the best known horsemen in the States, came to Calgary last week to complete the transaction with V. Marzulli, the owner, but was refused. A rumor, however, that the Russian government has been brought in is still without the wonderful piece of horse-bred.

The Russian government has adopted the policy of buying the fastest horses in the world and sending them to Russia for breeding purposes. However, the only horse that has been bought since eight years ago, and losing it, was for the Russian government. It is now in Russia, and the sale of the horse is being handled through Mr. Parkin, who is acting as the agent for the Russian government.

Several other fast horses have been bought by the Russian government. When seen last night Mr. Parkin was told that the Russian government was buying the horse, but was refused. A rumor, however, that the Russian government has been brought in is still without the wonderful piece of horse-bred.
